

Software Services for

WHAT WE CAN BUILD USING ONAPP'S API?

User & Service Portal

Are you thinking about selling services based on OnApp? We can help you with design and development of Client Portal specifically for your's customer base. Client Portal where customers can see all VM instances. Extend or limit the management features visible to customers.

Management Portal

Portal for your staff to manage clients and their services (VMs, IPs, CDN, smart servers, bare metal servers). We can help with design and development of portal where you can control all customers and their assigned resources.

Sign Up Page & Billing

We can craft beautiful signup pages to help you sell services based on OnApp. HTML5 forms with custom fields: location, RAM, HD and more during signup. Creating billing software for all methods (usage, metered, monthly, weekly, daily, hourly)

OUR DEVELOPMENT PROCESS: STEP-BY-STEP

Contact

1

Email/Phone communication to get all necessary requirements for development. After gathering informations we will provide free quote.

Pre-Development

2

We will work with you on selecting the best software development process and programming language to bring your idea to market as soon as possible. We will show pros & cons of each methodology or language.

Development

3

You will get access to repositories and staging servers to track progress of our work.
